## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 32-43, drawn to a method or receiving, transmitting and obtaining.
- II. Claims 44-49, drawn to a consuming device.
- III. Claims 50-58, drawn to a consumable item package.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II & III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case group II can perform the step of consuming and group III can receive and transmit different information.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as just consuming. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3627

During a telephone conversation with Patrick Buckley on 3/30/05 a provisional election was made without traverse to prosecute the invention of group I, claims 32-43. Affirmation of this election must be made by applicant in replying to this Office action. Claims 44-58 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32, 33, and 36-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirst et al.

Hirst et al. shows, figure 5, a new consumable (receiving consumable item) at print engine (consuming device). The figure shows requesting date information from a consumable memory (device physically associated, able to dispense updates) and downloading updates (executable program) if needed. Toner and papaer can be dispensed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 34, 35, and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirst et al. in view of Cheng et al.

Hirst et al., as applied above, shows all of the limitations of the claims except for payment and verification.

Cheng et al. teaches, column 3, bottom, to top of column 4, an automatic software updating system. Where the vendor charges for the software update, the service provider computer may intermediate between the software vendor's computer and the client computer to enable an electronic payment by the user to the software vendor. When the electronic payment is authorized, the client application downloads the software update and completes the installation as described. Additionally, the service provider computer may authenticate the software update and check to ensure that it is not corrupted, for example by computer viruses. This process protects the customer and the software provider.

Based on the teaching of Cheng et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Hirst et al.

system to incorporate the payment and verification methods of Cheng et al. in order to protect the customer and the software provider.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
